

User Acceptance Testing Requirements

Project Name

E-Commerce Checkout System

Business Objective

The checkout system must allow customers to purchase products securely and efficiently.

Functional Requirements

FR-001 User Authentication

Users must be able to log in before checkout.

FR-002 Cart Validation

The system shall validate cart contents before payment.

FR-003 Payment Processing

The system shall support:

- Credit Cards
- Debit Cards
- UPI
- Net Banking

FR-004 Order Confirmation

The system shall send an order confirmation email after successful payment.

Non-Functional Requirements

NFR-001 Performance

Checkout page must load within 3 seconds.

NFR-002 Availability

System availability must be 99.9%.

NFR-003 Security

All payment transactions must be encrypted using HTTPS.

Acceptance Criteria

1. User can complete purchase successfully.

2. Payment failures display meaningful error messages.
3. Confirmation email is generated.
4. Inventory updates after purchase.
